

Instructions to reset passwords.

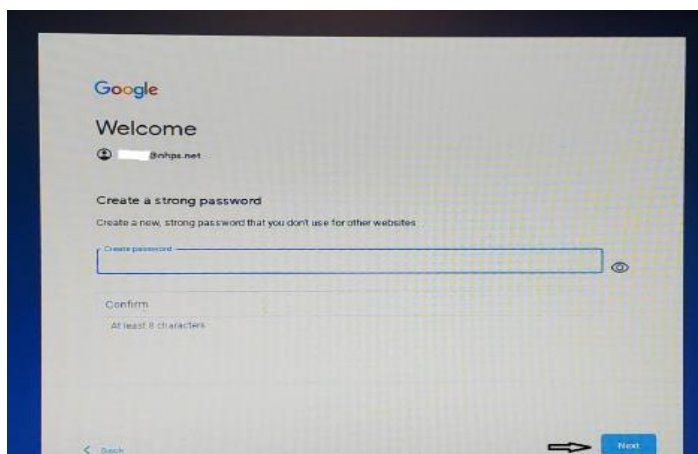

Changing an expired Google password.

The screenshot shows the Google password reset interface. At the top, the Google logo is displayed. Below it, the word 'Welcome' is followed by a profile icon and the email address '@nhps.net'. The main heading is 'Create a strong password', with a sub-instruction: 'Create a new, strong password that you don't use for other websites.' There are two input fields: the first is labeled 'Create password' and the second is labeled 'Confirm' with a sub-instruction 'At least 8 characters'. A 'Next' button is located at the bottom right, and a 'Back' button is at the bottom left.

This screenshot is identical to the previous one, but it includes two black arrows. One arrow points to the 'Create password' input field, and the other points to the 'Confirm' input field, highlighting the fields where the user enters their new password.

This screenshot is identical to the previous ones, but it includes a black arrow pointing to the 'Next' button at the bottom right, indicating the step to proceed after the password is entered.

4. Your password has been successfully changed. There is no confirmation screen, you will simply access the device or service you were attempting to access. If the passwords do not match, or do not meet the requirements you will remain on the password change screen.
