11. Evidence of Effectiveness & Evaluation

Answer all questions

- a. What **<u>specific need</u>** will this contractor address and how will the contractor's performance be measured and monitored to ensure that the need is met?
 - i. ARTE's goal is to provide opportunities to improve critical thinking and analytical skills. To consistently engage multiple skills and abilities and develop a student's and family's imagination and judgment. ARTE will be measured and monitored by conducting site visits and providing comprehensive surveys to students and parents at the end of the program to measure outcomes and results. Quantifiable data is collected and used to fine-tune programs.
 - ii. Services will be monitored using the APT tool, which assess the overall quality of the programs staffing, staff's engagement with students and families, collaboration with NHPS staff, transitioning of students and activities offered. The evaluation team consist of the Building Leader with a team, which may consist of other NHPS staff, parents and community members. APT raters observe and score staff interactions (manner, affect, and tone of voice) with youth and families. The observers rate areas such as:
 - 1. Are staffs greeting students and families
 - 2. Transitioning of students
 - 3. Does the space provide appropriate room for all youth and staff?
 - 4. The ability of staffs to communication with youth and/or their families in their language(s).
 - 5. The support staff provide in assisting youth with organizing and preparing themselves to do their homework.
 - 6. Staffs adjustments and accommodations for students based on their experiences and needs and that
 - 7. Staffs use of simple reminders and redirection to support positive behaviors.
 - 8. Dismissal Process

- b. If this is a **renewal/continuation service** <u>attach a copy of the evaluation or archival data</u> that demonstrates effectiveness.
- c. How is this service aligned to the District Continuous Improvement Plan?
 - i. Participants will engage in opportunities to improve critical thinking and analytical skills. To consistently engage multiple skills and abilities and develop a student's and family's imagination and judgment. These are an integral part of a child's development and important components of the Connecticut State Department of Education accountability. Programs like these are especially important in urban areas where children do not have the same access, exposure, and experiences as their suburban peers.
- 12. Why do you believe this Agreement is fiscally sound?
 - a. This agreement represents tremendous value for the district. ARTE provides an array of services to youth and families across New Haven. At a price of \$350 a session, ARTE provides both youth and family programming that aids in the development and various skills that improve the quality of life of those who participate. Other contractors charge up to \$400 or more for similar services.
- 13. What are the implications of not approving this Agreement?
 - a. Students will not be granted the opportunity to participate in activities that build important developmental factors. Without these types of opportunities, we are limiting the activities we provide to our youth. Lack of support could lead to an increased risk of youth engaging in negative activities outside of their parents/guardian's supervision.

IMPACT STATEMENTS

Research Supporting the Impact of Arts Programming

In the report, Champions of Change: The Impact of the Arts on Learning, published jointly by the President's Committee on the Arts and Humanities and the Arts Education Partnership, several independent researchers concluded that engagement in the arts nurtures the development of cognitive, social and personal competencies. Arts programs can increase academic achievement, help decrease youth involvement in delinguent behavior and improve youth attitudes about themselves and the future.

Specifically, researchers found that learning in and through the arts:

- Contributes significantly to improve critical thinking, problem-solving and decision-making.
- Fosters higher-order thinking skills of analysis, synthesis, and evaluation.
- Regularly engages multiple skills and abilities.
- Develops a person's imagination and judgment.

Learning in and through the arts can even help students overcome the obstacles of disadvantaged backgrounds. For example, one of the Champions of Change reports, using data from a study that followed over 25,000 students for 10 years, found that students consistently involved in the arts show significantly higher levels of mathematics proficiency by grade 12 - regardless of their socioeconomic status. (Source: NEA: Publication – "How the arts can enhance after school programs.")

Research Supporting the Impact of Exercise & Physical Fitness Programming

One in three kids in the United States is overweight or obese. Obesity can also have serious ramifications for kids' cognitive development. Further, both childhood obesity and poor academic performance tend to be clustered in schools with a high percentage of lower-income, minority students, creating a student health issue that is especially problematic in those communities.

There is a growing body of evidence indicating that physical activity and fitness can benefit both the health and academic performance of children, both immediate and long-term. Over time, as children engage in physical activity, they can have additional positive effects on academics in mathematics, reading, and writing. A research project conducted with 24 elementary schools, showed that adding sessions of physical activity could have long-term benefits, such as improved academic performance.
